

The Software Solution Suite is a collection of multiple easy to use applications, which will help any company to optimize different processes throughout their entire organisation.

All of our solutions are divided into five unique categories which will tell you exactly the kind of service the software provides.

Create **Input** **Process** **Analyse** **Store**

3s.DMS solution

Save and share documents within your organization through a secure cloud solution

3s.DMS is a user-friendly solution for having documents directly available to the right people within the organization. A document management system is a form of office automation in which you and your colleagues store, process and edit documents. It's in the cloud, which means you can access it from anywhere on any device. This makes it a lot easier to work together with colleagues on the same document.

All this is secure, AVG-proof and in accordance with the guidelines for confidentiality applicable in your industry.

The solution replaces the frequently used folder structure. Because of the way the system is set up, companies can be up and running within one day with the 3s.DMS solution.

100% cloud based

Work anywhere and anytime with this fully cloud based application.

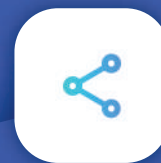

Quick setup

We will have you up and running within a couple of hours.

User friendly

Once you've worked with 3s.DMS for five minutes, it'll feel like you've worked with it for years.

Save and share

3s.DMS works like the Windows folder structure, but it's easier to save and share documents.

The journey of your documents

How important are your company documents, pictures and all the other files for the business? Exactly, they are essential. That is why we, Spigraph, came up with the different steps your company needs to take to make business processes easier, more efficient and safer. Welcome to 3s., our Solution Software Suite.

Create

Make something you are proud of. And let us help you where we can. All the products in our 'Create' category give you the tools to produce whatever you and your company need.

Input

We want to make scanning as easy as possible for you. Therefore, we have the best scanners available, but we also have great software to cater to all your scanning needs. You'll find those products in our 'Input' category.

Process

Make your working life easier. All of our solutions in the 'Process' category help you to improve performance, increase efficiency of document processes and enhance the value of your capture solution.

Analyse

Do you know all the content located on all the systems in your organization? Our solutions do. The products in our 'Analyse' category will help you find, organise, classify and manage content located in systems and repositories across your entire organization.

Store

And last but not least: you can create whatever you want, but you also need a place to store all that great content. The solutions in our 'Store' category offer you just that. Nothing more, nothing less.

Solution Software Suite by Spigraph

Spigraph is one of the leading providers of document capture and processing solutions. In addition to its portfolio of document scanners from the world's leading manufacturers, Spigraph supports its customers in automating business processes and generating operational efficiencies through digital transformation.
